Environmental Product Declaration

EPD

Design: arge2

sner-Hager Möbel GmbH	Manufacturer
zer Straße 22	Declaration holder
950 Altheim	
0043 7723 460-0	
://www.wiesner-hager.com/en/	
22012 1634 6300-201 03297740290	EPD number
0-201 puc	Declared product
Stacking chair	
s declaration was compiled according to ISO 14025 and EN 15804 type B. It cribes the environmental rating of the listed product and gives the possibility ompare it with other similar products.	Purpose
e content of this declaration is based on the results of the operational life cycle essment, according to EN ISO 14040/44 of the fiscal year 2022/23. The used eric data comes from acknowledged life cycle management databases and ent EPD's of the declaration holders upstream products and are calculated ing the CML method. s://www.wiesner-hager.com/en/about-us/sustainability/life-cycle-assessment/	Data origin
procedure to compile this declaration was audited on 14 th September 2023	Auditing
Ing. Dr. Jürgen Hain, TÜV Austria GmbH, Wien	Auditor
means of the certificate TA 22012 1634 from 26 th September 2023, TÜV tria GmbH authorizes the declaration holder to generate EPD type III.	Certification
certificate is valid until 30 th September 2026. The compliance of the uirements will be ensured by annual, internal and external evaluations.	Validity
hard Steigthaler, Master of Sciene, environmental engineer	Issuer

Functional unit	The general information of the LCA refers to whole lifecycle, beginning with the raw material make, the manufacturing of the product until the disposal of <i>one</i> unit of the product with an anticipated lifespan of 15 years. But the division of impact factors with the masses of the product allowes also a specific statement in mass.
Application	Seating for public areas, acc. to EN 16139, EN 1022, EN 1728 and DIN 4573
Identification of product	6300-201 puc puc Stacking chair, polypropylene seat shell, seat upholstered
Description of product	The versatile all-rounder. The multi-purpose chair puc can be used in all areas of contract architecture – from a linkable chair in auditorium seating to a solo chair. The chair family owes its popularity to its wide range of variants and "hidden" features: This is made possible by useful and intelligent features that are cleverly integrated into the design of the chair: the ingeniously simple, plastic linking system with integrated panic lock is hidden inconspicuously beneath the lateral shell moulding. puc combines design quality with all the functional requirements.
Configuration of	cover 1 fabric S3140 plain black; colour of plastic 72 black; colour of metal chrome; leg finish plastic glides

Material composition

The proportion of secondary raw material in this product is 29,8%. It includes 9,9% renewable materials.

Use of laquer and adhesives

Application	Chemical characterisation	Weight ¹	VOC ²	Classific.3
Wood glues	-	-	-	-
Hotmelt adhesives	-	-	-	-
Fabric glues	Waterbased dispersion adhesive	0,04 kg	0,0%	no
Fabric glues	Waterbased dispersion adhesive	0,004 kg	0,0%	yes
Assembly adhesives	-	-	-	-
Stains	-	-	-	-
Water-based varnish	-	-	-	-
Powder coatings	-	-	-	-

The product is free of halogenated plastics (PVC).

¹ dry matter ² uncured ³ acc. EG Reg. No 1272/2008

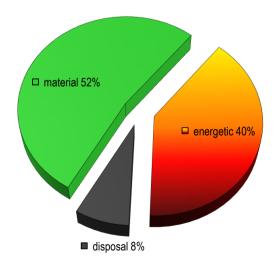

Material certificates

The following certificates are valid only for the mentioned raw-materials but not for the final product:

Upholstery fabric: Oeko-Tex Standard100 - certificate 073313.O, product class II Upholstery materials: Oeko-Tex Standard100 - certificate AMM 17680, product class I

Recycling rate (EoL)

The chart shows the presently usual recycling rate in Western Europe, based on the used material mix.

The thermal recycling will release energy to the amount of 103 MJ. This is equivalent to 2,9 litre of light fuel oil.

The remaining ash from the incineration will be disposed of in a landfill.
