 bloum

Natural shape. Sustainable design.

bloum counters the cool, puristic design of technology-laden office and commercial architecture with a more emotional perspective. By allowing patterns inspired by nature to infuse the spatial environment, the shell chair addresses the need for biophilic design elements. *bloum* incorporates contours reminiscent of plant leaves and curved, organic shapes. The armrests, back and seat merge seamlessly into one another. The chair nestles against the body of the user, providing flexible yet stable support. The indentations in the back provide *bloum* with a subtle mobility.

Design: neunzig° design

A tribute to organic shapes.

The chair evolved out of the idea of covering a wide range of applications both in commercial and public buildings using one shell shape and different frame variants. **blom** can be found not only in lounge areas, working cafés, bistros, hotel rooms, and waiting areas, but also in meeting and conference rooms as well as offices. The glass-fibre-reinforced polypropylene seat shell with a sandwich structure offers outstanding stability and durability for intensive use. At the same time, the twopart backrest provides a comfortable level of elasticity and flexibility. The plastic content consists of 100 % recycled polypropylene. All of these features combine to make **blom** a durable and sustainable product of exceptionally high quality.

Rich in detail.

Optional.

Frame variants.

The numerous design options for the shell in combination with different frame variants – from the classic 4-legged base to a modern swivel base on glides or casters through to a swivel base constructed of solid beech or oak – allow **bloum** to be tailored to suit a wide range of interior design spaces and usage scenarios.

Sustainable polypropylene seat shell.

The glass-fibre-reinforced polypropylene seat shell with a sandwich structure offers outstanding stability and durability for intensive use. At the same time, the two-part backrest provides a comfortable level of elasticity and flexibility. The plastic content consists of 100 % recycled polypropylene.

Auto-return mechanism.

The version with a four-star swivel base is equipped with an auto-return mechanism.

Colour selection.

The non-upholstered matt plastic shell is available in four colours: white, black, sand, and mocca anthracite. Perfectly coordinated metallic shades create a stylish monochrome appearance.

73 white

53 sand

74 mocca anthracite

72 black

6226 Conference chair

four-star swivel base

6227 Lounge chair

four-legged base of tubular steel

6228 Lounge chair

four-legged wooden frame and auto-return mechanism

Standard models:

Conference chair 6225:

Four-star swivel base of die-cast aluminium, polished or powder-coated, plastic glides. Swivel column with auto-return mechanism and depth suspension, chromium-plated or powder-coated cover. Plastic content of seat shell: 100 % recycled polypropylene.

Conference chair 6226:

Four-star swivel base of die-cast aluminium, polished or powder-coated. Load-dependent double castors with brakes and soft tread. Swivel column cover chromium-plated or powder-coated. Plastic content of seat shell: 100 % recycled polypropylene.

Lounge chair 6227:

Four-legged base of precision tubular steel, Ø 18 mm, plastic glides. Powder-coated metal surface. Plastic content of seat shell: 100 % recycled polypropylene.

Lounge chair 6228:

Four-legged base in solid beech or oak, plastic glides. Auto-return mechanism, polished or powder-coated aluminium connectors. Plastic content of seat shell: 100 % recycled polypropylene.
