*The electrically height-adjustable
foxx Conference makes it easy to switch
between sitting and standing meetings.*

foxx Conference. Encourages a change of perspective.

Varying your posture at work ensures that the human musculo-skeletal system remains free of discomfort even on long working days. What applies to work should also be the norm for communication. That is why meetings held in a standing position are becoming increasingly important. However, meetings of this kind are not only relevant from an ergonomic point of view, they also contribute to greater efficiency. Studies show that 30 % less time is needed to make decisions in meetings conducted while standing. With **foxx Conference**, Wiesner-Hager offers a range of electrically height-adjustable conference tables with

an adjustment range of 650 to 1290 mm, making it possible to switch quickly between sitting and standing meetings. The special frame construction in tubular steel ensures maximum stability – even with large conference table formats. The hand switch used to adjust the height is equipped with a memory module. This allows different height settings to be saved and called up directly. The large selection of table top formats and surfaces offers plenty of scope for creative design, from functionally modern through to high-quality and elegant.

Standard model:

Table tops: choice of laminate (MFC) or HPL Fenix top with seamless, moisture resistant laser edge (ABS edge) or MDF board with veneer and laminated wood edge (straight part of the edge). Bevelled part of MDF edge in black. Other wood surfaces stained acc. to WH collection.

Frame: Infinitely electrically height-adjustable, tubular steel frame with T-leg base, column 70 x 70 mm, table top support black powder-coated, black adjustable plastic glides. Metal surfaces column and cantilever foot powder-coated either 55 eloxal silver, 9005M pitch black or 9016 white.

Electric cabling (optional):

Rectangular cable flap:

Metal (for standard laminate and HPL Fenix table tops): powder-coated aluminium, with flap.

Veneer (for veneered table tops): flush flap with touch function.

Horizontal cable channel: metal cable channel, black, powder-coated.
