paro_3

Austria's most popular office chair.

How do you become a bestseller in office chairs? By combining the highest ergonomic standards with durability and an attractive price. It is precisely these qualities that have made *paro* the most popular office chair family in Austria – with more than 600,000 units sold throughout Europe. With *paro_3*, Wiesner-Hager is launching the third generation of *paro* swivel chairs which combine proven ergonomic functionality with new versatile designs and excellent value for money.

Design: Klingerbohrdihn

More versatility –
for greater creativity.

paro_3 offers a remarkably wide range of design options: one particular highlight is the variety of backrests available. These feature a modern, dimensionally stable mesh back in three colourways and, on request, a distinctive black 3D mesh with designer quilting. Alternatively, the backrest is also available as an upholstered version to match the seat cover, with a wide range of fabrics and colours from the entire Wiesner-Hager collection to choose from. The upholstered backrest version is also available with an eye-catching quilted design on request.

The ergonomically shaped black membrane seat is padded with a 50 mm layer of cut foam – soft and dimensionally stable, offering a high level of comfort. Should a classically upholstered seat be the preferred option, the complete range of Wiesner-Hager fabrics is available for selection.

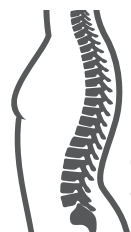

A variety of armrest options in 2D and 4D designs featuring a comfortable arm pad, an elegant plastic or metal swivel base and an optional neck support round off the wide range of configurations available for *paro_3*, guaranteeing maximum freedom of design.

Full backing for your well-being.

At the touch of a button the height of the back can be adjusted on both the upholstered and the mesh versions. This ensures ergonomic support over the whole area of the back, as well as exact adaptation to each user's body shape from the lumbar spine to the thoracic vertebrae. An additional lumbar support is available if desired. In addition to the standard backrest, a higher backrest model has been included in the range so that tall persons, too, are afforded full back support.

Optimum support in the area of the thoracic vertebrae.

Optimum support in the area of the lumbar spine.

The flexible plastic frame allows for slight torsions and thus promotes micro-movements.

Suits everyone.
On request even automatically.

Synchro-mechanism with quick lateral adjustment of the spring tension.

This tried-and-tested mechanism accommodates a weight range of 40 to 120 kg. The backrest pressure can be adjusted precisely to suit individual body weight in just a few turns, ensuring that the seat and backrest are finely tuned to each other – for dynamic sitting and a perfect back support. This mechanical design is also available with an optional seat tilt adjustment feature (3° forward tilt).

Synchro-mechanism with automatic weight adjustment and fine-tuning.

In practice, individual adjustment options are frequently ignored or used incorrectly. This is why Wiesner-Hager is also offering a synchro-mechanism for *paro_3* that automatically adjusts to weights between 40 and 120 kg. A load-dependent mechanism reacts to the user's body weight when they sit down, automatically adjusting the backrest pressure and creating an intuitive sitting experience. Those who want a slightly different, individual backrest pressure can also make additional adjustments using the fine tuning feature.

24/7 synchro-mechanism, capacity up to 180 kg.

Another variant is the 24/7 synchro-mechanism. This was specially developed for above-average demands resulting from round-the-clock use – such as in shift work in control rooms. Thanks to the enhanced spring tension adjustment and a selection of particularly durable fabrics, the 24/7 office chair can also support weights of up to 180 kg. The side-mounted quick adjustment of the spring tension also ensures optimum ergonomics for the 24/7 synchro-mechanism.

Responds flexibly
to every user.

Rich in detail.

Finely harmonised movements – with only one turn.

Thanks to the quick tension spring adjustment you can adapt the backrest pressure to your body weight, thus ensuring finely harmonised movements of the seat and back. The synchronised mechanism can be locked in several positions.

Adjusting the infinitely variable seat height.

The seat height is infinitely adjustable by means of a gas spring compliant with EN 16955 and depth suspension.

Neckrest (optional).

Models with a high backrest can be equipped with an adjustable neckrest.

Adjusting the seat depth.

The seat depth can be easily adapted to suit the user's body-size via the sliding seat.

Adjusting the height of the backrest.

The height of the backrest can be adapted to various body sizes. Thus the back is perfectly supported.

Arm options (optional).

The chair can be supplied with height and width adjustable arms or 4D arms, which are additionally adjustable in depth and have swivelling armpads.

Lumbar support (optional).

Optimal support for the spine. By adjusting the backrest height, the lumbar support can also be adjusted vertically to suit the sensitive area of the spine.

Ready to go.

On request, *para_3* is delivered flat-packed: this saves space on shipping and saves the environment. Assembling is easily accomplished within a few minutes.

Optional.

			
5240 swivel chair - 5240-501 flat-pack - 5240-101 assembled membrane seat, back with mesh H 950-1115 / SH 420-530 / W/D 680	5241 swivel chair - 5241-501 flat-pack - 5241-101 assembled high back, membrane seat, back with mesh H 1045-1210 / SH 420-530 / W/D 680	5242 swivel chair - 5242-503 flat-pack - 5242-103 assembled membrane seat, back upholstered H 950-1115 / SH 420-530 / W/D 680	5243 swivel chair - 5243-503 flat-pack - 5243-103 assembled high back, membrane seat, back upholstered H 1045-1210 / SH 420-530 / W/D 680
			
5244 swivel chair - 5244-501 flat-pack - 5244-101 assembled seat upholstered, back with mesh H 950-1115 / SH 420-530 / W/D 680	5245 swivel chair - 5245-501 flat-pack - 5245-101 assembled high back, seat upholstered, back with black 3D mesh with design quilting H1045-1210 / SH 420-530 / W/D 680	5246 swivel chair - 5246-503 flat-pack - 5246-103 assembled seat and back upholstered H 950-1115 / SH 420-530 / W/D 680	5247 swivel chair - 5247-503 flat-pack - 5247-103 assembled high back, seat and back upholstered, with design quilting H 1045-1210 / SH 420-530 / W/D 680

H = total height / SH = seat height / W = width / D = depth (dimensions in mm)

Standard models:

Swivel chairs:
Black plastic swivel base. Twin wheel castors with load-dependent brakes and hard running surface, Ø 60 mm. Black plastic control elements and armrests. Backrest: Plastic frame with a choice of mesh covering (optional black 3D mesh with design quilting) or upholstered (optional design quilting). Choice of black membrane seat or upholstered seat.

Functions:
Seat height adjustment via gas spring in accordance with EN 16955 and deep suspension. Seat depth can be adjusted thanks to a sliding seat (adjustment range: 60 mm), featuring a return spring. Height-adjustable backrest (adjustment range: 50 mm).

Mechanism variants:
Synchro-mechanism with individual lateral adjustment of spring tension (from 40 to 120 kg), lockable in four positions. Optional: Synchronous mechanism with seat tilt adjustment – seat can be tilted forwards through 3 degrees.
Synchro-mechanism with automatic weight adjustment (from 40 to 120 kg), lockable in three positions. Fine tuning for individual backrest pressure.
24/7 synchro-mechanism with individual lateral adjustment of spring tension (up to 180 kg), lockable in four positions, with seat tilt adjustment – seat can be tilted forwards through 3 degrees, aluminium swivel base.

Options (surcharges apply):
Adjustable lumbar support, aluminium swivel base, adjustable neckrest (for models 5241, 5243, 5245 and 5247), black 3D mesh with design quilting, design quilting for upholstered backrest.

Armrest variants (surcharges apply):
2D armrests:
Adjustable in height and width, with soft armrest pads. Arm supports either black plastic or polished aluminium.
4D-Armlehnen:
Rotatable pad, adjustable in height, width and depth, with soft armrest pads. Arm supports either black plastic or polished aluminium.

Perfect Partners.
