point

Rich in detail.

Optional.

point adapts to user needs.
Synchronic adjustment of depth of seat and height of the backrest by means of only one button via a diagonal telescopic rod. Therefore, the size of the swivel chair ideally adapts to the user.

Pleasantly soft.
Foamed polyurethane arms to ensure soft arm support. The height of the arms can be adjusted individually at the push of a button – independent from synchronic size adjustment.

Prestigious.
Padded neckrest for swivel chairs with high backs.

Dynamic sitting.
Synchronic inclination mechanism with tension spring adjustment to ensure optimum support of the body in every sitting position.

Stacking.
The cantilever chair is stackable to a stack size of four chairs.

The office chair series *point* combines well-engineered ergonomics with distinctive and unique shaping. Most striking feature: the light transparent netting of the backrest, shaped like a tight sail. A form conveying harmony and lightness. *point* offers an excellent quality of seating through its patented synchronic adjustment of the depth of seat and height of the backrest. Due to

these features the size of the swivel chair can be easily and exactly adjusted to fit the body size of the user. The integral synchronic mechanism with tension spring adjustment supports and stimulates dynamic sitting. The *point* office chair series is completed by a stackable cantilever chair.
