— puc

The image shows a row of modern, blue plastic chairs with black metal legs, arranged on a light-colored wooden floor. The chairs are viewed from a low angle, emphasizing their design. In the background, a large window or glass wall looks out onto a courtyard with a white building and some autumn foliage. The text "The versatile all-rounder." is overlaid in the top left corner.

The versatile all-rounder.

The multi-purpose chair *puc* can be used in all areas of contract architecture – from a linkable chair in auditorium seating to a solo chair. The chair family owes its popularity to its wide range of variants and „hidden“ features: This is made possible by useful and intelligent features that are cleverly integrated into the design of the chair: the ingeniously simple, plastic linking system with integrated panic lock is hidden inconspicuously beneath the lateral shell moulding. *puc* combines design quality with all the functional requirements. When linking, the angled element is screwed into the adjacent chair

and securely fixed in place by means of its V form. This ensures that row seating can be assembled and disassembled particularly quickly. The optional seat numbers can be clipped on without tools. The lateral shaping of the shell functions as a stacking guide and protection, and serves to accommodate the armrest. The chairs can be stacked vertically. A blend of chairs, with and without arms, can be interlinked and stacked. The seat shell is available in seven attractive colours and in beech or oak plywood.

Light and full of character while being extremely robust.

The large corner radii of the plastic shell dominate the *puc* silhouette and underline its creative touch. The slender metal frame made of high-quality round tubular steel is not obtrusive and lends the chair its essential light-footedness. Wiesner-Hager has made no compromises when it comes to seating comfort. The special shape of the plastic shell and the generous seat width ensure the chair is ergonomically comfortable to sit on – even over long periods of time.

Design: arge2

Rich in detail.

Optional.

6300 Stacking chair

Polypropylene seat shell, not upholstered, seat upholstered, front upholstered or fully upholstered
H 830 / SH 435 / W 540 / D 510
centre-to-centre distance 535 mm

6302 Stacking chair with arms

Polypropylene seat shell, not upholstered, seat upholstered, front upholstered or fully upholstered
H 830 / SH 435 / W 590 / D 510
centre-to-centre distance 535 mm

6301 Stacking chair

Seat shell in beech or oak plywood, without upholstery, seat upholstered, front of shell upholstered or fully upholstered
H 830 / SH 450 / W 540 / D 550
centre-to-centre distance 535 mm

6303 Stacking chair with arms

Seat shell in beech or oak plywood, without upholstery, seat upholstered, front of shell upholstered or fully upholstered
H 830 / SH 450 / W 590 / D 550
centre-to-centre distance 535 mm

H = total height / SH = seat height / W = width / D = depth / dimensions in mm

Standard models:

Stacking chair 6300 & 6302: precision tubular steel frame, plastic glides. Seat shell in polypropylene, mat. Polypropylene arm pads. Metal surface powder-coated.

Stacking chair 6301 & 6303: precision tubular steel frame, plastic glides. Seat shell in beech or oak plywood. Polypropylene arm pads and frame cover. Metal surface powder-coated.

Writing tablet with quick-change system 9316 for models 6300 & 6302: compact top, metal surfaces powder-coated. Folding, removable, mounting possible only on the right hand side. Preparation for writing tablet assembly necessary. Chairs with mounted writing tablet are not stackable and can not be linked.

Transport trolley 6387 for writing tablets with quick-change system 9316: Capacity: 54 writing tablets

Seat number 9087 and row number 9088: row linking is necessary.
