 pulse

Act on impulse.
Understatement is the new importance.

Design: LUCY.D

New growth.

With *pulse*, Wiesner-Hager has created an elegant conference table system for top executives, with an inspiringly light visual touch and a functional design. The aim was to create a range of conference tables that set a new lightness of touch against the old heaviness of the boardroom. The modular design of *pulse* is the key to its individuality. This allows a vast number of different configurations: large or small, a block, an open or closed circle. Planning is quick and easy, with numerous, predefined arrangement variants. If you prefer individualised solutions, *pulse* has a wide range of options to offer you.

Summit meeting.
Light is the new success story.

Impulsive business.
Functionality creates a new status.

The intelligent functions of *pulse*: they are not obtrusive, but you can call on them at any time. One such example is the innovative cable management feature. The cables are routed invisibly from the floor box inside the table support column. The integrated horizontal cable duct is useful at two levels, for housing cables and plug-ins, or for media boxes, for example. Or with drop-in trays that can be used for writing utensils, plants, beverages or snacks. *pulse* as a source of energy – for people and office equipment.

Rich in detail.

Optional.

Innovative style of management.
pulse cable management stays discreetly in the background. Invisible to the naked eye, the cables run below the table top in a built-in horizontal cable duct. The cables are routed – also invisibly – through the supporting column of the table frame.

Virtually invisible.
 The vertical cable housing is invisible to the naked eye in the supporting column of the table frame. Cables can easily be drawn in through the detachable cover and connected to external outlets, such as floor boxes.

At two levels.
 The horizontal cable duct has multiple uses: an (optional) drop-in tray serves as a beverage box, a plant holder or a utility box, with the electric cables or plug-ins running underneath.

Configurations of tables with X-leg and T-leg frame:

Configurations of tables with C-leg frame:

pulse individual tables:

Standard model:

Table tops:

choice of laminate (MFC) or HPL top (conference tables: HPL Fenix, individual tables: HPL and HPL Fenix) with seamless, moisture resistant laser edge (ABS edge) or MDF board with standard veneers or premium veneers (walnut, zebrano) and laminated wood edge (straight part of the edge). Bevelled part of MDF edge in black. All other wooden surfaces stained acc. to WH collection.

Conference tables: veneer or wood design standard laminate: veneer direction crosswise. Table top includes cable channel and flap. Reinforcement plinths along both longitudinal edges, sheet steel powder-coated black 9005.

Individual tables: wood veneer: veneer direction crosswise. Standard laminate and HPL top (wood design): longitudinal direction. Table top of boat-shaped tables includes cable channel, sheet steel powder-coated black 9005.

Frame:

cantilever foot and top support polished or powder-coated die-cast aluminium, supporting column powder-coated aluminium or polished against surcharge, plastic glides.

Linking device (conference tables):

permanently mounted linking of table tops at the longitudinal plinths (extra linking device not necessary).

Modesty panel height 300 mm (conference tables, optional): black powder-coated aluminium frame, covered with black mesh.

Electric cabling:

Conference tables:

Cable channel: black 9005 powder-coated metal.

Flap: length 500 mm, perforated metal, powder-coated as per colour card.

Individual tables (optional):

Rectangular cable flap: length 1000 mm, for boat-shaped tables. Powder-coated metal acc. to WH collection. Flap with screeprinted ornament.

Round cable grommet: Ø 80 mm for round table. Either silver, black or white plastic or aluminium (stainless steel effect).

Accessories (conference tables):

black plastic insert for jardiniere and beverage box.

Perfect Partners.
