

dely conference table

Essentials

Art of Conferencing.

With *delv*, Wiesner-Hager offers a range of conference tables that boast a blend of high quality, functionality and sustainability all packed into a stylish design.

Thanks to its clear lines and timeless look, *delv* creates a design statement in modern meeting and conferencing environments.

It has an understated and unobtrusive appearance, making it ideal for undisturbed communication.

Design: arge2

Art of Conferencing.

Wood as the dominant visible material creates a harmonious atmosphere in conference rooms, while adding a homely touch to the office.

Art of Conferencing.

What makes *delv* so special is the tabletop, which appears light and floating, and the A-shaped frame.

The slanted frame with its trapezium-shaped profile is attached at the top to a support structure that reinforces the tabletop. As a whole, *delv* presents an overall compact appearance.

Material and colour options.

The *delv* range of conference tables offers a wide array of material and colour options: The table surface is available in high-quality veneer, hard-wearing decorative laminate and robust HPL surfaces.

As a result, *delv* offers great flexibility when creating interior designs for sophisticated office and hospitality architecture as well as for higher education establishments and many other types of public building.

Single and double tables.

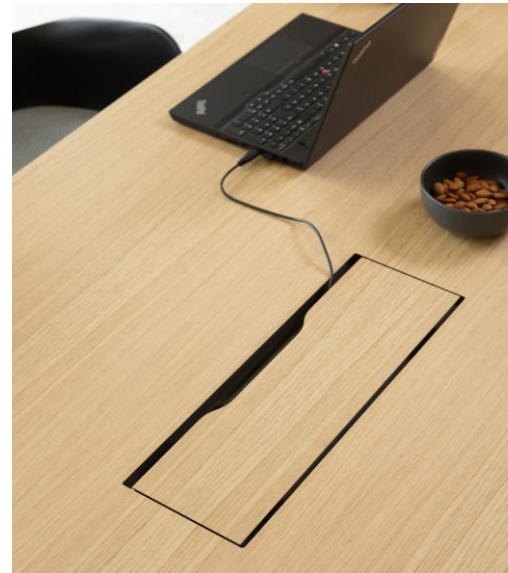

There are several table formats to choose from ranging from compact single tables to large double tables measuring up to 140 x 480 cm for 14 people.

The double table is connected by a centre leg which guarantees that the table system is extremely stable.

Features

A-shaped frame.

The frame is available in a choice of solid beech or oak, but also in a functional, robust aluminium version.

Ample legroom.

The central position of the frame ensures ample legroom and comfortable seating, even at the head and foot of the table.

Horizontal cable channel.

The horizontal cable channel allows cable routing to remain invisible.

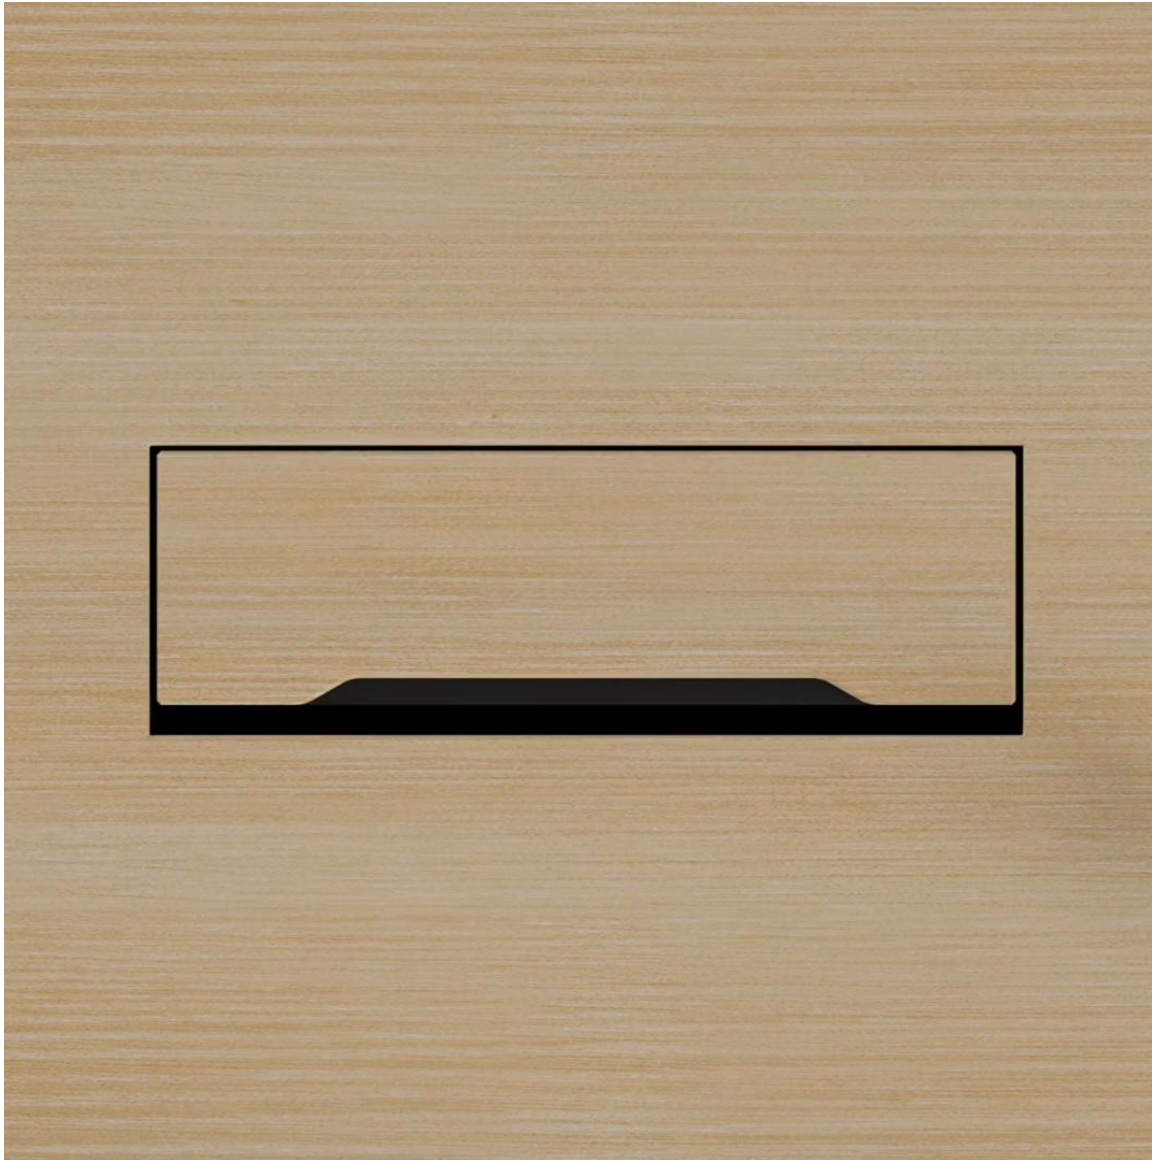

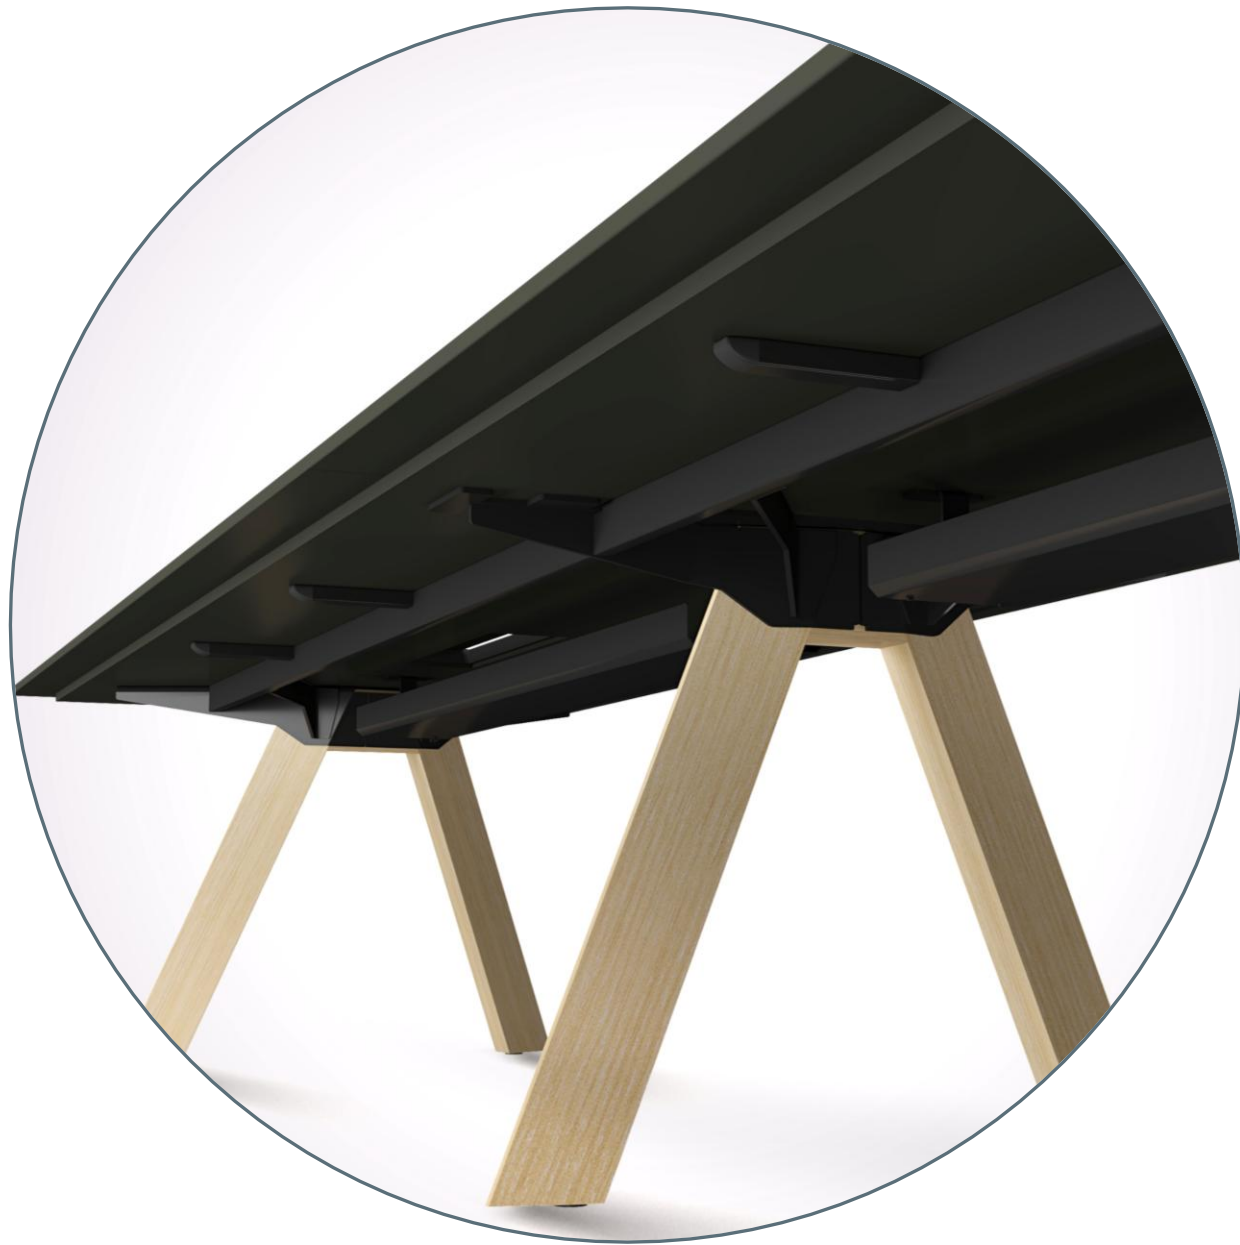

Metal cable aperture.

Sophisticated cable routing ensures that modern media technology can be easily integrated without a tangle of cables.

Veneer cable aperture.

With veneered tabletops, the flush cable flap featuring a touch function can be elegantly retracted, allowing you to plug in cables conveniently from both sides.

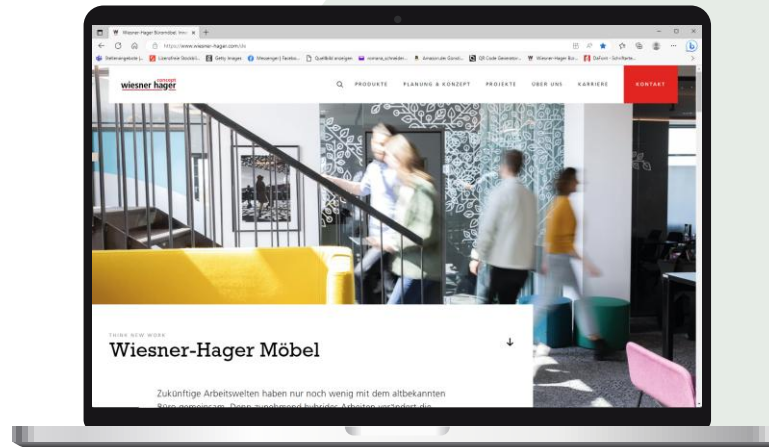

Stable connection.

The double table is connected by a centre leg. The frame construction is an additional guarantee of greater stability.
