

NO CLIMATE CHANGE...THERE IS NO CLIMATE CHANGE..

The news ticker repeatedly displays
the breaking headline:

NO CLIMATE CHANGE... THERE IS NO
CLIMATE CHANGE... NO

A quote drawn from the rhetoric of
denial, presented in the format of
urgency, yet one that cultivates
indifference.

And what does *bloum* do?
bloum melts.

What remains is a state of matter:
liquid, shapeless, honest. The material
that once mimicked the plant world
has lost its mask. What is left is the
substrate: a raw material extracted
from the earth, refined, shaped, sold,
used, recycled, and sold again.

Is this the disruption of the cycle,
or its end?
